Recommendation Letter for Vinícius Pinheiro

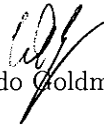

I know Vinícius for more than four years. He started working with me in a project to the State Legislative Assembly of São Paulo where we used innovative software engineering techniques. Then he started his master science degree under my supervision. His subject is the use of mobile agents in a grid middleware. He started his PhD under my supervision on August 2009.

We already have a paper on a prestigious Brazilian conference. Recently we had a paper accepted on the international workshop Middleware for Grid Computing (MGC'09) which is part of the prestigious Middleware conference.

I strongly support his submission for this Erasmus scholarship.

Please do not hesitate in contact me if you need further information.

Sincerely,

Alfredo Goldman vel Lejbman
